BIM and Jobsite Location Awareness

Cameron Frazer
Get The Point (GTP)

Jonathan Horne
Red Point Positioning (RPP)
The Problem

• Where am I?
• What am I looking at?
• Is this equipment in the right place?

• Do I have to search the entire model?
The EBS-260

- Handheld with color touchscreen
- 2.2” Printhead (32 dot)
- Prints directly on any material
- Bluetooth and WiFi connectivity
What if you could do...

- On-site, in-building, 3D navigation
- Asset tracking with real-time and historical analysis
- Geo-fencing for safety with alarming or auto-shutdown
- Sensor measurements for occupancy, light, heat, temperature, gasses, humidity...
Ultra-Wideband (UWB) “Indoor-GPS” Technology

- \((x, y)\) positions with 20cm resolution
- Ad-hoc mesh network, adaptive, self-healing
- Battery powered or wired tags and anchors
- Truly wireless infrastructure
Integration with a tablet model viewer.
